

VISHESH JANGID

+91 9834940829 | vishesh.domain@gmail.com | github.com/Visheshj111 | linkedin.com/in/vishesh-jangid | Pune, India

EDUCATION

Bachelor of Computer Applications (BCA)

Indira College of Commerce and Science, Pune

2024 – 2027

CGPA: 8.96 / 10

TECHNICAL SKILLS

Languages: C++, Java, JavaScript (ES6+), TypeScript, C, SQL, HTML5

DSA: Arrays, Linked Lists, Binary Trees, Graphs, Hash Maps, Sorting, Recursion, Dynamic Programming — C++

Systems / Backend: Node.js, Express.js, GraphQL Yoga, BullMQ (distributed queuing), SSE, JWT (httpOnly), AES-256-CBC, Web Push API (VAPID), CORS, Connection Pooling

Frontend: React.js, Next.js 15, TailwindCSS, Vite, Recharts, Framer Motion

Databases: PostgreSQL, MongoDB Atlas, Drizzle ORM, Prisma

DevOps / Infra: Docker, Docker Compose, GitLab CI/CD, MinIO (object storage), Render, Vercel.

EXPERIENCE

Full Stack Developer Intern at Codemetron

Feb 2026 – Present

Remote, Part-time · Stack: Next.js 15, TypeScript, GraphQL Yoga, PostgreSQL, BullMQ/Redis, Docker, MinIO, GitLab CI/CD

- Architected async distributed email verification pipeline: custom Node.js proxy routing concurrent jobs across 4 threshold-activated Docker worker containers, each independently scaled using queue depth as the load signal; applied producer-consumer concurrency model in production.
- Implemented distributed job queue with BullMQ (Redis-backed) for bulk email campaign processing; designed async jobld polling pattern for non-blocking status tracking; integrated MinIO object storage for CSV data pipelines.
- Built concurrent SMTP account management with real-time status streaming via SSE; enforced AES-256-CBC encrypted credential storage and JWT httpOnly cookie auth with CORS-controlled routing.
- Engineered 3-step campaign composer (live HTML preview, per-recipient personalization, open/bounce tracking, scheduler) and analytics dashboard via GraphQL CRUD and REST API integration.
- Containerized full stack with Docker Compose; maintained via GitLab CI/CD pipelines with version-controlled deployment infrastructure.

PROJECTS

Lumia Mail: Self-Hosted Bulk Email SaaS

2026 - Codemetron

Stack: Next.js 15, TypeScript, GraphQL Yoga, PostgreSQL, BullMQ/Redis, MinIO, Docker, SSE

- Designed per-recipient personalization engine with dynamic variable substitution at send time across bulk campaigns; built open-tracking (pixel beacon) and bounce tracking (webhook classification) subsystems.
- Implemented one-click unsubscribe system with suppression list management; built time-zone-aware campaign scheduler with BullMQ-based delayed job scheduling and real-time progress updates via SSE.

Full-Stack Aptitude Assessment Platform github.com/Visheshj111/aptitude-test-app

Oct 2025

Stack: React, Node.js, Express, MongoDB Atlas, JWT, TailwindCSS

- Built scalable concurrent examination platform load-tested under 200+ simultaneous users; applied connection pooling and optimized MongoDB Atlas query patterns to manage high-concurrency database access.
- Designed anti-cheat subsystem: tab-switch monitoring, DevTools detection, policy-violation auto-submission; implemented admin dashboard with real-time candidate monitoring and domain-restricted registration.

PlayNear: Sports Academy Discovery Platform

2026 - Codemetron

Stack: Next.js, TypeScript, PostgreSQL, Prisma, MinIO, Docker Compose, Google Maps API

- Built full-stack geolocation platform with geocoding for Indian addresses; implemented image storage pipeline with MinIO, LCP performance optimization, and data migration tooling; containerized via Docker Compose.
- Delivered admin and academy dashboards with optimized data access patterns; onboarded 20+ sports academies live in production for athlete discovery.

Persisto: AI-Powered Goal Tracking github.com/Visheshj111/Persisto

Jan 2026

Stack: React, Vite, Node.js, Express, MongoDB, OpenAI API, Google OAuth.

- Built AI-powered productivity platform delivering personalized daily tasks via OpenAI API; deployed on Fly.io and Vercel.
- Selected among Top 10 teams at State-Level OpenAI Hackathon from 250+ submissions, 700+ participants.

ACHIEVEMENTS & CERTIFICATIONS

- Among Top 10 teams which were recognised for a unique idea in State-Level Open AI Hackathon (250+ teams, 700+ participants), January 2026.
- Deloitte Data Analytics Certification.
- State-Level Sepaktakraw Player | Represented college in Football and Cricket.
